Swine Product

**ARBP Combined Vaccine**
(Inactivated; with oil-adjuvant)

**Indications**
Prevention of swine atrophic rhinitis caused by *Bordetella bronchiseptica* and/or toxicogenic *Pasteurella multocida*

**Directions/Dosages**
Administer 2 ml of the vaccine twice at an interval of 1 to 2 months by intramuscular injection; the second injection should be given at 2 to 4 weeks before farrowing. When using the vaccine as the booster dose at the next or succeeding breeding, 2 ml each of this product should be intramuscularly injected once at 2 to 4 weeks before farrowing.
